Professional Summary

Python Backend Engineer | Generative AI Engineer with 4+ years of experience building scalable backend applications using **Python**, **FastAPI**, and **Django REST Framework**. Experienced in designing **REST APIs**, **microservices**, and real-time systems. Hands-on experience developing **Generative AI** applications using **Retrieval-Augmented Generation (RAG)**, **OpenAI APIs**, **Qdrant Vector Database**, and **Sentence Transformers** for semantic search and intelligent document question answering. Proficient in **AWS**, **Docker**, **RabbitMQ**, **Redis**, **MongoDB**, **PostgreSQL**, **MySQL**, and modern CI/CD practices.

Technical Skills

Languages & Frameworks: Python, FastAPI, Django, Django REST Framework, PHP, Laravel, CodeIgniter, JavaScript, React.js

Frontend: HTML, CSS, Bootstrap, jQuery, Ajax

Databases: MySQL, PostgreSQL, MongoDB

Caching & Messaging: Redis, Kafka, RabbitMQ

Tools & DevOps: GitHub, CI/CD, Docker, AWS (EC2, RDS, S3, Lambda), BetterStack, Vault, Gitleaks, SonarQube

Security & Compliance: WAF, ZAF, Secrets Management.

AI & Generative AI: Retrieval-Augmented Generation (RAG), OpenAI SDK, Large Language Models (LLMs), Qdrant, Sentence Transformers, Vector Embeddings, Semantic Search, Hybrid Search, Metadata Filtering, Configurable Chunking, Prompt Engineering, Conversation Memory, Async FastAPI APIs, Streaming Responses, Dockerized AI Deployment

Others: REST APIs, WebSocket, JWT, OAuth2, System Design, ER Diagrams, Technical Documentation, Jira, Pytest

Professional Experience

Neosoft Technology Pvt Ltd., Python Developer

Noida

June 2025 – Present

- Designed and developed **microservice architecture** to build scalable and modular applications.
- Implemented **Redis** for caching, rate limiting, and performance optimization.
- Worked with **Kafka** to build event-driven **notification systems** and asynchronous processing.
- Created detailed **technical documentation**, including **ER diagrams** and backend **system roadmaps**.
- Wrote unit tests and integration tests in Python to ensure reliability and maintainability.
- Designed and developed **Retrieval-Augmented Generation (RAG)** services for enterprise document search and AI-powered question answering.
- Built document ingestion pipelines including PDF parsing, intelligent chunking, embedding generation, metadata indexing, and vector storage using **Qdrant**.
- Developed FastAPI APIs for semantic retrieval using **Sentence Transformers**, improving contextual response accuracy through vector similarity search.
- Implemented conversation memory and streaming AI responses for interactive chatbot experiences.

Kutumbh Care Pvt. Ltd., Backend Developer

Noida

- Developed RESTful APIs using **FastAPI** with automated documentation (Swagger/OpenAPI). May 2022 – June 2025
- Managed databases (**MySQL, PostgreSQL, MongoDB**) with indexing and query optimization.
- Engineered microservices architecture with **RabbitMQ** for async communication.
- Built real-time **WebSocket-based** chat systems with presence and typing indicators.

Key Projects

AI Knowledge Assistant (RAG)

- Developed an AI-powered knowledge assistant for enterprise PDF-based question answering using **RAG**.
- Built a complete document ingestion pipeline with PDF parsing, configurable chunking, metadata extraction, embedding generation, and vector indexing in **Qdrant**.
- Implemented semantic and hybrid search using **Sentence Transformers** with metadata filtering to improve retrieval accuracy.
- Developed asynchronous **FastAPI** APIs with conversation memory and streaming responses for real-time AI interactions.
- Containerized the application using **Docker** and designed a modular, production-ready AI backend architecture.
- **Tech Stack:** Python, FastAPI, OpenAI API, Qdrant, Sentence Transformers, Docker, Async FastAPI

CuDel

[cudel.in](#) 

- Designed a **real-time chat system** using **WebSocket** with notification and message persistence.
- Implemented **asynchronous task processing** via **RabbitMQ** for microservice communication.
- Integrated **Algolia Search** to provide fast, typo-tolerant, and faceted search functionality throughout the application.
- **Tech Stack:** FastAPI, MongoDB, WebSocket, RabbitMQ, AWS

WorCo

[worco.in](#) 

- Built robust back-end modules for **attendance tracking, expense management, and live location monitoring** with **geo-fencing**.
- Integrated **Razorpay** for secure online transactions, invoice generation, and real-time tracking of payment status.
- Designed and implemented **Role-Based Access Control (RBAC)** to manage permissions at the feature level.
- Implemented **JWT-based authentication** to ensure secure and scalable user session management.
- **Tech Stack:** FastAPI, PostgreSQL, MySQL, AWS, Razorpay, JWT, CI/CD

Education

MCA **AKTU University**, IPEM College, Ghaziabad

2020 – 2022

- CGPA:7.1

BCA **CCS University**, IPEM College, Ghaziabad

2016 – 2019

- CGPA:6.8
